

# Speedwell Weather

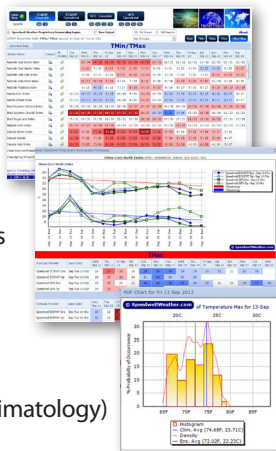

WRMA  
London 2013  
Product  
Focus

Founded in 1999, Speedwell Weather provides weather data, forecasts, software, and consultancy to the energy, commodity and weather risk markets.

With offices in the UK and the USA we serve clients in insurance, banking, agriculture and energy sectors world-wide.

## Forecast SuperPack <sup>NEW</sup>

- Access to 1,000+ probabilistic downscaled forecasts of daily temperature and precipitation based upon the ECMWF and GFS models
- Access to the Dashboard, FastCast™, Graphical Viewer and distribution curves
- Access to commodity index basket forecasts
- Provision of all ensemble members
- Downscaled ECMWF monthly forecasts
- Observed data (history, on-going and climatology)
- Full verification for all models

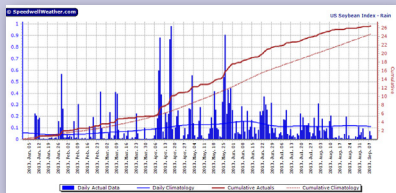

## Global Commodity Tracking

We provide 100+ weighted-baskets that represent the main agricultural commodity growing and energy demand or generation regions. These provide the essential information for tracking the impact of weather on traded commodities.

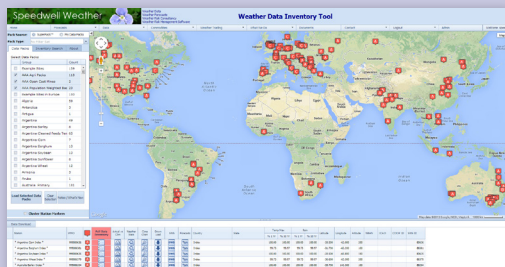

For each basket we provide the following:

- Cleaned historical data and smoothed climate normal series
- Ongoing cleaned feeds
- 15-day forecasts (Speedwell downscaled ECMWF & GFS)

Indexes can be tracked on our web-site tools including Actuals-vs-Climatology which shows how cumulative rainfall/temperature compares with climate normals with a projection using forecasts.

Packs include Argentina Corn, Australia Cotton, Brazil Sugar, Ivory Coast Coffee, China Rice North, Kazakhstan Spring Wheat, Ukraine Sugar Beet, US Citrus, US Corn (Delta) etc.

## SWS

The Speedwell Weather System is the definitive weather derivative pricing and risk management system. The result of over twelve years of continuous development, SWS offers sophisticated pricing tools as well as comprehensive portfolio management and back office support including **risk reporting and margining tools**.

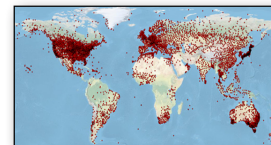

SWS is used by banking, insurance, energy and investment fund clients worldwide and is available either as an installed application or delivered over the web.

## Speedwell Cleaned Weather Data

**There is a lot of bad weather data out there!**

Speedwell cleaned data removes doubt: it has been processed to fill missing values and correct erroneous observations. The end result is a data set that is ready to be used for analysis.

We clean weather data from thousands of stations every day.

## Speedwell SuperPack®

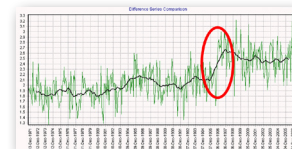

Allows subscribers to take any data set and/or feed from our extensive archive of tens of thousands of data sets for a single annual fee. This dramatically simplifies the licencing of weather data, removing the need for multiple data supply contracts.

## Settlement Data

We are the dominant provider of settlement data to the OTC weather risk markets.

## Speedwell Recalibrated Data

Critical for the correct understanding and quantifying of weather risk, our Recalibrated Data Sets re-base historical data to current site location, conditions and instrumentation by adjusting for historical temperature discontinuities.
