Press Release

Speedwell Weather System **SWS**

Credit Lyonnais Rouse Derivatives Choose SWS 3.0 to support their expanded Weather Trading business.

Speedwell Weather Derivatives is pleased to announce that Credit Lyonnais Rouse Derivatives, a Division of Credit Lyonnais SA, has become a client of Speedwell Weather Derivatives by licencing an enterprise version of the Speedwell Weather System, **SWS**.

Peter Brewer, head of weather trading at Credit Lyonnais Rouse Derivatives said, "We have seen significant growth in demand from our clients for weather hedging. We found that **SWS** supported our needs in pricing, risk management and back office processing of weather derivative transactions and was easy to integrate into our existing internal reporting and payments infrastructure."

Stephen Doherty, director of Speedwell Weather Derivatives said "We are very pleased to have won a client of the standing of Credit Lyonnais Rouse Derivatives. Their order closes a very successful first year of marketing of SWS in which we have won several clients for **SWS** in the banking, energy, broking and insurance sectors."

About Speedwell Weather Derivatives

Speedwell Weather Derivatives is the provider of the Speedwell Weather System, **SWS**. **SWS** is an open client-server software application for the weather derivatives market. **SWS** covers pricing, risk management and weather exposure analysis. Pricing implements capital-markets, portfolio and actuarial methodologies. **SWS** offers full support for front and back office including the process management of the entire life cycle of a weather derivative trade. In the last year Speedwell Weather Derivatives have sold SWS to a wide range of clients in the banking, energy, broking and insurance sectors in Europe, the USA and South Africa.
