## **Press Release**

### **Speedwell Weather Derivatives**

#### **Speedwell Appoints Daniel Greenstein**

Speedwell Weather Derivatives (SWD) is pleased to announce the appointment of Daniel Greenstein to its office in Alexandria Virginia. Daniel will be responsible for supporting SWD's continued growth in forecast and data products in the USA. This continues SWD's strategy of expansion in the USA to satisfy growing demand for its services in the energy, weather derivative and agricultural markets.

Daniel is a graduate in Meteorology from Pennsylvania State University and has served as an operational meteorologist, most recently at Storm Exchange.

#### **About Speedwell Weather Derivatives (SWD)**

Founded in 1999, SWD provides software, weather data, forecasts and consultancy to the weather derivative and energy markets. SWD is the provider of the Speedwell Weather System (SWS).

SWD also helps companies looking to hedge against weather risk by quantifying such exposure, structuring an appropriate hedge and placing the risk within the weather market in which activity it is authorised and regulated by the UK Financial Services Authority.

Speedwell Weather Derivatives have clients in sectors covering insurance, banking, investment funds, energy and broking in Europe, North America, Africa and the Asia Pacific region.
