

Summer 2009

It has been a busy summer here at Speedwell... we have expanded our Recalibrated data offerings, installed weather stations in Chile, introduced an innovative approach to data sales, greatly expanded the functionality of our web site, and made some new friends.

Recalibrated Data—LONDON HEATHROW

We have now expanded our total number of Recalibrated stations to 30 (24 US, 4 Australian, 1 Dutch, and 1 UK).

Main Entry: Recalibrated Data

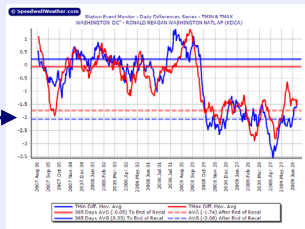

Part of Speech: *noun*

Definition: Data that has been adjusted to correct for temperature discontinuities, making the history compatible with how the station is reporting today (but not detrending!)

Usage: Recalibrated data allows for a more accurate assessment of climatology because discontinuities have been removed.

Available Now:

- Real-time monitoring of any site showing how it is running NOW.
- Recalibration-on-demand.

Coming Soon:

- More European sites

Settlement Services - STATION INSTALLATION

We are pleased to be providing full weather settlement services for a recent substantial weather transaction in Chile. This involved installing two new reference weather stations. This can be a cost effective route to reducing the perception of moral hazard and problems with settlement delays.

Problem

- Missing / erroneous data
- Delayed data
- Limited data
- No data
- Possible moral hazard

Solution

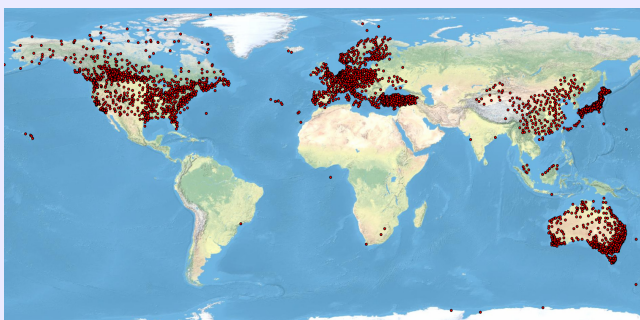

- Cleaned data
- Synthetic data / Station install
- Synthetic data / Station install
- Station install
- Station install

Global Data Sales- THE SUPERPACK

Huge inventory for one low annual fee

- 50+ countries
- 4,000+ global stations
- Historical data / ongoing feeds
- Hourly & daily data
- Variables: temperature, precipitation, snowfall, wind...

SWS continues to evolve and improve with the release of version 6.6. In addition to **SWSConnect** which is delivered over the web we are now offering SWS-Hosted offering the full benefits of SWS with no maintenance. SWS can also now be licensed with the SuperPack for unbeatable world data coverage. We are grateful to our new customers who have licensed SWS this year, some joining us on a hosted basis.

Speedwell Web Site... our web site has sprouted more tools including those below. www.SpeedwellWeather.com

Analogue Years

View the evolution of a weather index relative to other chosen historical periods to see possible out-turns

Actuals Vs Climatology

Tabular or graphical view of any weather variable relative to climate normals for any period.

Commodity Weather Group - NEW PARTNERS

We are pleased to have partnered with CWG combining our quantitative products with CWG's qualitative forecast services.

In the Pipeline A wide range of new probabilistic forecasts based on Recalibrated climatologies
