

Founded in 1999, Speedwell Weather supplies historical and real-time weather data for thousands of weather reference sites around the world. Speedwell has direct data supply agreements with a wide range of national meteorological services and provides a single-point of contact for the provision of high quality weather data to the energy, agriculture, banking,

Speedwell Data Services - Agriculture

We continue to expand our global crop specific data packages. These packages focus on the most highly traded agriculture commodities in the world (eg coffee, sugar, maize [corn], wheat, and cotton)

For each crop we offer a relevant group of stations. For each station group we offer the following products:

-  **Historical data**
 - Daily temperature & precipitation
 - Cleaned data
 - 30+ years of history depending upon the station
-  **Climatology**
 - Calculated normals for a station
 - 10 yr, 20 yr, ...
 - Smoothed dataset

-  **Ongoing feeds**
 - Previous day actual
 - Cleaned data
-  **Forecasts**
 - Station level forecasts
 - Speedwell GFS MOS
 - 15-day temperature
 - 15-day precipitation

Global Commodity Data Packages

- Access to individual station data
- Access to crop / country index

Online Data Inventory

www.SpeedwellWeather.com

Geographical data search or display by data pack

Display of station location on a Google map interface

Ability to download from web site

Access to data tools (actual vs. climatology, cone chart, weather stats,...)

Detailed station inventory

Station	WMO	Full Data Inventory	Actual vs Clim	Weather Stats	Cone Chart	Down Load	SWS	Country	State	Temp Max		Rain		
										% 1 Yr	% 10 Yr	% 1 Yr	% 10 Yr	
Group Name: China Cotton (Count = 23)
